

Assignment - 2

1) Problem 1

<https://leetcode.com/problems/interval-cancellation/description/>

2) Problem 2

<https://leetcode.com/problems/counter/description/>

3) Problem 3

<https://leetcode.com/problems/function-composition/description/>

4) Problem 4

Write a JavaScript program to implement drag-and-drop functionality to allow users to reorder items in a list.

OR

Write a JavaScript function that changes the background color of an element when a mouse enters it.

Hint: for problem 4 → you have to make a webpage having box in it and when you hover in it it should change color. Similar for second part when we click on the button it shows the drop down .
